FOR IMMEDIATE RELEASE

Owners of Microtech Welding Acquire Shar Systems

January 10, 2022: Fort-Wayne based Shar Systems has been acquired by the owners of Microtech Welding, who have a vision for the long-term growth and success of the 55-year-old industrial mixing and fluid processing company.

Matt Wojewuczki and Doyle McCauley purchased Microtech Welding four years ago after enjoying successful careers with larger corporations. Through their professional experience, they became experts in their respective areas: manufacturing and supply chain, process improvement, culture building, sales and marketing; and just as they did at Microtech, they will bring that expertise to the table to reinvigorate Shar Systems and build upon its longstanding success in its industry.

Since the two purchased Microtech, they have improved processes and steadily grown the business. “We have discovered that we like working within smaller companies, so when we were presented with the opportunity to acquire Shar Systems, my partner Doyle and I knew we couldn’t pass it up,” Wojewuczki said. “Our focus will be to continue the long-standing Shar focus on customer satisfaction and the development of our employees.”

The new ownership was official January 3, 2022, and Wojewuczki expressed there were many reasons the investment made sense: 1- proximity to Microtech Welding; 2- the size of Shar Systems will enable them to be nimble and make immediate improvements; 3- it has a strong legacy within the community and the industry; 4- and it has a proven track record of longevity—all of which make it a very worthwhile and exciting opportunity.

“Shar Systems already has a great customer base and produces a high quality, American made product,” McCauley explained. “We are coming at this with a growth mindset and look forward to improving service, delivery, and installation.”

About Microtech Welding
